# SATENIK HAKHVERDYAN

## Senior Angular Developer | Senior Frontend Developer

Yerevan, Armenia | hakhverdyansatenik@gmail.com | Portfolio | LinkedIn | GitHub

### SUMMARY

Senior Angular Developer and Frontend Developer with 5+ years of experience building and scaling enterprise Angular applications in FinTech, workforce management, and digital publishing. Led a 90,000+ line Angular 14 to 19 migration with zero downtime, raising Lighthouse performance from 68 to 92 and lifting test coverage from 42% to 85%. Deep expertise in Angular architecture (Standalone Components, Signals, NgRx), performance optimization, and reusable component systems for large-scale SPAs.

### SKILLS

**Frontend:** Angular (9–20+), TypeScript, JavaScript, RxJS, NgRx, Signals, Standalone Components, HTML5, SCSS/CSS

**Architecture:** Nx monorepos, Module Federation / Micro-frontends, SPA design, reusable component systems, Webpack/Vite

**Testing:** Jasmine, Karma, Jest, Cypress, Angular Component Harnesses

**Performance:** Lazy loading, OnPush change detection, code splitting, Lighthouse auditing, bundle optimization

**Data & APIs:** REST APIs, AG Grid, Highcharts, JSON, Node.js (basics)

**DevOps:** GitHub Actions, Jenkins, CI/CD, AWS (basics)

**Also:** React, Vue.js, Vanilla JavaScript

### EXPERIENCE

**Frontend Developer (Angular)** — Optimum Partners, Yerevan, Armenia

*Aug 2024 – Present*

- Build features for Forbes' publishing platform (Bertie), including story scheduling, video upload, and AI-assisted content tooling used by editorial teams across Forbes' global newsroom (thousands of contributors)
- Maintain near-100% unit test coverage (Jasmine, Karma) on owned features for a high-traffic, high-availability publishing platform
- Adopted GitHub Copilot into the team workflow, contributing to an estimated 20–25% improvement in feature delivery speed, consistent with published Copilot productivity research
- Shipped scheduling and publishing systems supporting reliable, high-availability editorial operations at Forbes scale

**Frontend Developer (Angular) — Part-time** — KAMI Workforce, Singapore (Remote)

*Jan 2025 – Nov 2025*

- Led migration of a 90,000+ line Angular application from v14 to v19 across five major versions with zero production downtime
- Raised the Lighthouse performance score from 68 to 92 through lazy loading, dependency cleanup, and rendering optimizations
- Cut bundle size by 25%, directly improving load time for end users on the workforce management platform
- Built 20+ reusable components, reducing new feature development time by roughly 30%
- Increased test coverage from 42% to 85%, meaningfully reducing regressions introduced during the migration
- Developed Highcharts-based data visualizations for complex workforce datasets

**Software Engineer** — Arnology LLC, Yerevan, Armenia

*Oct 2021 – Aug 2024*

- Delivered scalable Angular and Vue applications across 3 client projects, from architecture through production release
- Improved page load time by 58% through targeted performance optimization
- Implemented NgRx for predictable, testable state management across multiple applications
- Built financial dashboards using AG Grid to handle large, real-time datasets for enterprise clients
- Refactored legacy code, reducing technical debt and improving long-term maintainability
- Mentored junior developers and led code reviews, raising team-wide code quality standards
- Collaborated cross-functionally in Agile teams across product, design, and QA

### SELECTED PROJECTS

**Ops Dashboard** (Angular 21, NgRx, Signals, AG Grid) — real-time operations grid with live data streams and zoneless change detection. Live demo | Source

**Story Composer** (Angular 21, Signals, CDK Drag & Drop, RxJS) — content scheduler with debounced autosave and drag-to-reorder queue. Live demo | Source

### EDUCATION

Master's Degree, Yerevan State University (YSU) — 2013 – 2019
